

Window Latch Installation

1. Gather the window latch items as shown below.

Required Parts

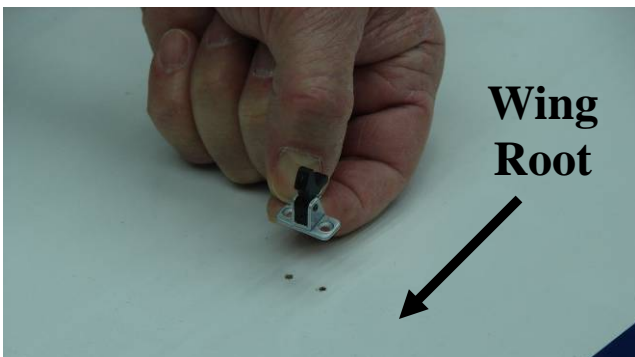

- ◇ 2 - Window Latches
- ◇ 4 - T2.6x10 Mounting Screws

Required Tools and Adhesives

- ◇ 1 - Phillips Screw Driver
- ◇ 1 - 1oz Bottle Gap Filling CA Glue

2. Align window latch with predrilled holes in the bottom of each wing. The hook portion of the latch will go towards the wing root.

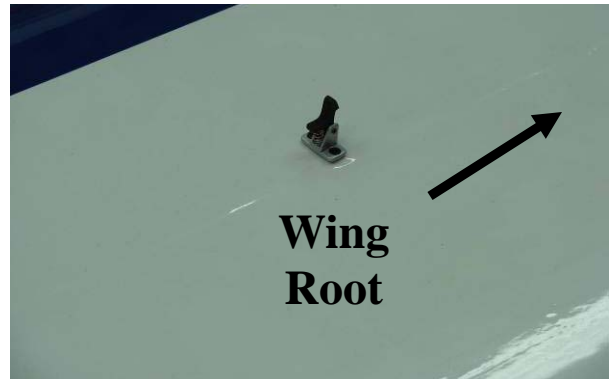

3. Use thick CA on each screw prior to installing to lock screws in place.

Note: CA glues have a fast drying time. Remember to work quickly.

4. Finished window latch installation shown below, repeat previous steps for remaining wing.

5. The window latch can be used to hold the side windows in place during field assembly.
